

How to add images straight into the WordPress Media file

Once you are logged into your WordPress account, click on 'Media' in the left hand menu of the WordPress dashboard

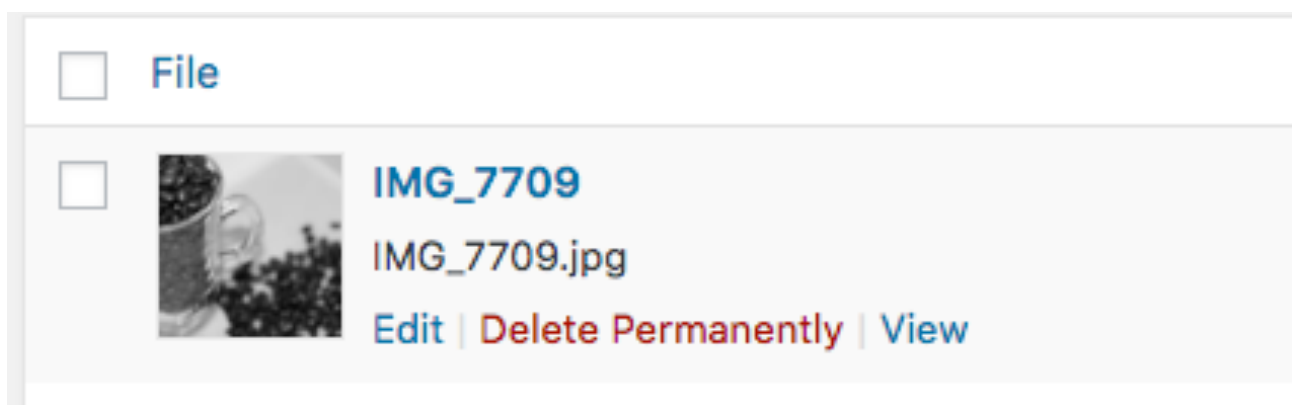

Then click the 'add new' tab

Click 'select files' or drag an image into the dotted square

It will then upload the new image for you

After you have uploaded the image, hover over it in the Media file section and click on 'Edit' you can then change the title and caption information by scrolling down the page.

Edit Media

Caption

Alternative Text

Description

Don't forget to give the image an Alt text - Description of the image - as this is what Google will capture as they are unable to read images.

That's it, as simple as that
